

Presentation Details

Length:

55-60 minutes – we perform for 45 minutes and we then spend 10-15 minutes answering questions and delivering our message to your students. If you wish, we can also perform an encore in addition to this. We are also happy to be available for 10-15 minutes to sign autographs and chat with students following the performance if you would like us to.

Performance Area:

Our performance area needs to be 16' wide and 12' deep. It is important that all audience members be able to view the performance from the front and not directly from the sides. We generally prefer to perform on the floor in order to relate to the students better, but we can perform on a stage if necessary.

Sound:

We provide our own sound system, suitable for indoor audiences up to 1000 people.

Lighting:

We do not supply any lighting, but normal room lighting or a general stage wash works fine.

Setup:

60 minutes. In order to set up in one hour, we ask to have exclusive access to the performance area during our setup and soundcheck. No other activities should take place in the performance area, and no students should be allowed to observe or distract from this activity. It also helps to have already set up any chairs needed for your staff or audience. Thank you.

Requirements:

One 6' by 3' table

One regular wall outlet on a different circuit from lights or other appliances

One parking spot near the doors that we will load our equipment through

Contact person:

We ask that you or someone on your behalf be available on our arrival for 10 minutes to show us where we are loading in and to discuss a few details such as introduction and audience seating. We also ask that you be available for 10 minutes after our presentation to provide us with your feedback about our show.

CD's:

Our price is based on the understanding that CD's can be left with the school for the week following the performance for students to purchase (the process is quite simple and we pay for the return shipping). Please let us know if your school is unable to do this so that we can discuss alternatives.

We strive to make your job of bringing in our presentation as easy as possible. If you have any suggestions for how we can better serve you, please call us toll-free anytime.
